Template for Preparation of 1-Page Papers APSIPA-ASC

First A. Author, Second B. Author, Jr., and Third C. Author, Member, IEEE

Abstract—This document is a template for Microsoft Word for the submission of a one-page paper to APSIPA conferences. If you are submitting a regular full contributed paper, please use the 4-page paper template available on the conference submission website.

I. HEADINGS

This template provides authors with most of the formatting specifications needed for preparing electronic versions of their papers. A brief abstract (containing unformatted text only) must also be entered in the abstract text box when submitting this paper on the web.

Headings may be used as required. Please adopt the Small-Caps heading style as used routinely in IEEE Transactions. References may be included if necessary, as may figures. But the overall paper (including references and figures) cannot exceed the one-page limit. Do not change the margins, column widths, font sizes, or line spacing to squeeze more text into a limited number of pages. Use italics for emphasis; do not underline.

II. OTHERS

Define abbreviations and acronyms the first time they are used in the text, even after they have been defined in the abstract. Do not use abbreviations in the title or heads unless they are unavoidable [7]. Use either SI (MKS) or CGS as primary units. (SI units are encouraged.)

You will need to determine whether or not your equation should be typed using either the Times New Roman or the Symbol font (please no other font). To create multileveled equations, it may be necessary to treat the equation as a graphic. Equation numbers, within parentheses, are to position flush right, as in (1), using a right tab stop. Italicize Roman symbols for quantities and variables, but not Greek symbols. Use a long dash rather than a hyphen for a minus sign.

\[ \alpha + \beta = \chi. \]  

(1)

Note that the equation is centered using a center tab stop. Be sure that the symbols in your equation have been defined before or immediately following the equation.

F. A. Author is with the National Institute of Standards and Technology, Boulder, CO 80305 USA (corresponding author to provide phone: 303-555-5555; fax: 303-555-5555; e-mail: author@boulder.nist.gov).
S. B. Author, Jr., was with Rice University, Houston, TX 77005 USA. He is now with the Department of Physics, Colorado State University, Fort Collins, CO 80523 USA (e-mail: author@lamar.colostate.edu).
T. C. Author is with the Electrical Engineering Department, University of Colorado, Boulder, CO 80309 USA, on leave from the National Research Institute for Metals, Tsukuba, Japan (e-mail: author@nrim.go.jp).

Figure captions should be below the figures; table heads should appear above the tables. Insert figures and tables after they are cited in the text. Use the abbreviation “Fig. 1”, even at the beginning of a sentence.
